DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 11-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Engman (#6,352,307).

Engman shows a chair comprising a base assembly, a seat supported by the base assembly, a pair of uprights connected to the base assembly and extending upwardly above the seat, wherein each upright has a longitudinal axis. An armrest is selectively positioned along each upright. A backrest is disposed between the uprights. A brace member is connected to upper end portions of the uprights.

With claims 2 and 19, each armrest has a mount sleeve and the backrest has a pair of mount sleeves.

With claims 3 and 13, the mount sleeves each have a cylindrical profile.

With claim 4, the uprights extend upwardly from opposite sides of the seat.

With claims 5 and 20, each upright has a channel extending along at least a portion of each of the mount sleeves.

With claims 6 and 14, each upright has a series of spaced holes.

With claims 7 and 15, each retention member is mounted to a respective mount sleeve.

With claims 8,16, and 21-22, each mount sleeve has a biasing member biasing the retention member to the first position.

With claims 9 and 17, the uprights are each attached to a base member.
